

FIELDSTATE OPTION A TERM SHEET

NewCo Founder-Led Structure

This term sheet is a non-binding discussion draft. It is not a legal agreement, not an offer of securities, and not legal advice. Any transaction should be documented by counsel.

Parties

Table:

*** Party | Description**

NewCo | Proposed company formed to own and operate Fieldstate.
Razim Wasti | Founder/operator and current technical/product lead.
Vlad | Commercial relationship partner, role to be agreed.
Investor | Prospective investor in NewCo.

Transaction

The parties form or designate NewCo. Fieldstate IP is assigned or exclusively licensed into NewCo only after founder, investor, services, and IP documents are agreed.

Indicative Economics

Table:

*** Item | Indicative Term**

Stage 1 funding | GBP 15k-30k for MVP v2 feasibility sprint.
Founder/operator retainer | Market basis GBP 10k-18k per month; offered at the discounted founder rate of GBP 6.4k per month while founder economics remain as proposed in this option. The discount is the founder's visible commitment to the company route.
Later model/data/cloud budget | Separately funded by Investor/NewCo as approved budget. Not included in Stage 1 funding.
Investor instrument | Equity, SAFE, convertible, or other instrument to be agreed.
Option/employee pool | 10%-15% indicative pool for CTO, engineers, ML contractors, advisors, and hires.

Indicative Cap Table Example

This example is included to make the commercial structure concrete. It is not a proposed final allocation and should be reviewed by counsel, tax advisers, and the parties before use.

Table:

*** Holder | Indicative Range | Rationale**

Razim Wasti | 30%-45% | Originator of the current build, technical/product lead, and delivery operator.
Vlad | 10%-30% | Commercial relationship partner, role and future contribution to be agreed.
Investor | 25%-45% | Capital provider for MVP v2, company formation, commercialisation, and future funding.
Option/employee pool | 10%-15% | Future CTO, engineering, ML, data, advisory, and hiring needs.

The ranges are alternatives, not additive; any agreed allocation must total 100%. One worked example within the ranges: Razim 40% / Vlad 15% / Investor 33% / Pool 12%.

Funding Ramp

Table:

*** Stage | Investor Funding | Commercial Effect**

MVP v2 feasibility | GBP 15k-30k plus retainer | Funds current sprint and preserves founder-led structure.
Pilot-ready product | GBP 50k-150k additional budget | Expands company value, validates customer/pilot use, and may justify revised investment terms.
Licensed data / advanced model programme | GBP 250k-750k+ additional budget | Funds the higher-risk model/data stage and may be tied to additional investor rights by agreement.
Platform scale-up | To be agreed | Larger platform, hiring, and commercial rollout budget; cap table impact to be agreed before funding.

Founder Technical Role / Interim CTO

Table:

*** Item | Indicative Term**

Initial role | Razim acts as founding technical lead / interim CTO during MVP v2 and transition unless otherwise agreed.
Scope | Product architecture, engineering direction, model-lab roadmap, data pipeline oversight, evaluation discipline, technical documentation, contractor supervision, and technical investor/pilot support.

Authority | Technical roadmap, architecture, model-evidence standards, and contractor/hiring recommendations should sit with the interim CTO role, subject to agreed budget and board/reserved matters.

Retainer | Included in the founder/operator retainer while Razim actively performs the interim CTO role.

Later CTO hire | A future CTO may be hired by NewCo, but replacement or transition should not remove Razim's founder economics, vested rights, IP protections, or agreed advisory/transition role.

Handover | Any handover to a later CTO or engineering team should be documented, paid if outside normal retainer scope, and tied to clear deliverables.

IP Ownership

- Prior to completion, Razim retains ownership of Fieldstate IP unless otherwise agreed in writing.
- On completion, Fieldstate IP is assigned or licensed into NewCo.
- IP should be transferred to NewCo, not to an individual.
- Background tooling, generic methods, and third-party dependencies require counsel review and carve-outs.

Founder and Investor Protections

- Founder vesting, leaver treatment, information rights, reserved matters, and pre-emption rights to be agreed.
- IP sale, exclusive licence, or material change of business should require agreed consent or reserved-matter approval.
- Removal without cause should not permit the company to capture all contribution value without agreed founder protection.

Conditions

- Company formation and shareholder documentation.
- IP assignment/licence documentation.
- Services, employment, interim CTO, or advisory agreement for Razim if he continues delivery or technical oversight.
- Treatment of Vlad's role and commercial contribution.
- Counsel review of open-data, third-party, and future data-licence obligations.

Non-Binding Effect

This term sheet is for discussion only. No party is bound unless and until definitive agreements are signed.
