

FIELDSTATE OPTION D TERM SHEET

Founder Optics Build Option

This term sheet is a non-binding discussion draft. It is not a legal agreement, not an offer of securities, and not legal advice. Any transaction should be documented by counsel.

Transaction

Option D is based on Option B but is intended as a company-building route, not a double-priced IP buyout route. Investor receives a paid exclusive build and investment option. Razim retains Fieldstate IP during the option period. Razim and Vlad receive visible founder-level allocations, with vesting and economics tied to their respective contributions. Investor receives a staged path to majority ownership if additional funding milestones are completed.

Indicative Starting Capitalisation

Table:

* Holder | Indicative Starting Allocation

Razim	30%
Vlad	30%
Investor	30%
Option / contractor pool	10%

The starting allocation is indicative only and subject to definitive company documents, tax advice, securities advice, and counsel review.

Investor Majority Path

If Investor funds agreed milestones, Investor may increase from 30% to a target majority position of 51%. Each step is achieved through new shares issued by the company at the funded milestone, diluting all existing holders pro rata. No transfer of founder-held shares is required for the majority path; if counsel instead recommends a call-option mechanism over founder shares, the tax, leaver, and vesting effects must be expressly addressed before signing.

Table:

* Stage | Investor Position | Razim Position | Vlad Position | Pool

Start	30.0%	30.0%	30.0%	10.0%
MVP v2 funded and accepted	35.0%	27.9%	27.9%	9.3%
First paid pilot / commercial proof	40.0%	25.7%	25.7%	8.6%
Licensed data / model budget funded	46.0%	23.1%	23.1%	7.7%
Platform / neural programme funded	51.0%	21.0%	21.0%	7.0%

The endpoint is intended to be economically close to a 21% founder position for each of Razim and Vlad, with pool top-ups (if needed for hiring) agreed jointly and priced into the relevant milestone. Any final structure should be checked for tax, securities, vesting, and dilution effects.

Founder Vesting

Table:

* Founder | Contribution Category | Vesting Basis

Razim	Product, engineering, data, model, evidence, demo, documentation	Build and technical/product milestones
Vlad	Investor relationship, commercial introductions, pilot development, partnerships	Funding, pilot, customer, and commercial milestones

Founder allocations may be subject to time-based and milestone-based vesting. The definitive documents should specify leaver treatment, acceleration, and treatment of unvested shares.

Founder Technical Role / Interim CTO

Table:

* Item | Indicative Term

Initial role	Razim acts as founding technical lead / interim CTO during MVP v2, option conversion, and
--------------	---

early NewCo transition unless otherwise agreed.

Scope | Product architecture, engineering direction, model-lab roadmap, data pipeline oversight, evaluation discipline, technical documentation, contractor supervision, and technical investor/pilot support.

Authority | Technical roadmap, architecture, model-evidence standards, and contractor/hiring recommendations should sit with the interim CTO role, subject to agreed budget and board/reserved matters.

Retainer | Included in Razim's founder/operator retainer while he actively performs the interim CTO role.

Later CTO hire | A future CTO may be hired by NewCo, but replacement or transition should not remove Razim's founder economics, vested rights, IP protections, or agreed advisory/transition role.

Handover | Any handover to a later CTO or engineering team should be documented, paid if outside normal retainer scope, and tied to clear deliverables.

Economic Terms

Table:

* Item | Indicative Term

Option fee | GBP 15k-25k, paid at signing; credit treatment to be agreed, consistent with Option B.

Option period | 60-90 days, extendable only by written agreement.

Razim founder/operator retainer | GBP 10k-18k per month while Razim actively delivers. The founder-rate discount available under Options A and B does not apply here, because the 51% majority path reduces founder economics; retainer and equity trade off consistently across all options.

Vlad commercial compensation | To be agreed; may be equity vesting, commission, retainer, or milestone warrants.

Stage 1 sprint/build fee | GBP 25k-50k, separate or rolled into milestone plan.

Advanced model/data budget | Separately funded by company/investor.

Separate IP buyout | Not part of the standard Option D company route. Applies only if Investor abandons the NewCo route and instead elects an outright acquisition/assignment route.

IP Ownership and Transfer

- Razim owns Fieldstate IP during the option period.
- Investor receives only defined demo/pilot rights during the option period.
- If the option converts into NewCo, IP transfers or is licensed into NewCo only after founder/investor/company documents are agreed.
- Under the NewCo route, the value of the Fieldstate IP is reflected in the founder allocations, retainer, staged funding commitments, and agreed founder floors. Investor should not be charged a separate full IP buyout on top of the 51% majority path.
- If Investor instead wants an outright acquisition outside NewCo, that becomes Option C or a separately negotiated buyout route, and IP transfers only after full payment or escrow release.
- If the option is not exercised, exclusivity expires and Razim retains all rights.

IP Transfer Sequence

Table:

* Stage | IP Position | Investor/NewCo Rights

Discussion / pre-signing | Razim retains all IP | No ownership or commercial rights.

Option period | Razim retains all IP | Paid exclusivity plus defined demo/pilot rights only.

NewCo documents agreed | Razim may grant NewCo an exclusive licence | Licence starts only after founder, investor, services, vesting, dilution, reserved-matter, and IP documents are agreed.

Initial funding received | NewCo may receive operating control under the licence | Control is limited to the agreed Fieldstate business and subject to payment and founder protections.

Assignment trigger satisfied | IP may be assigned to NewCo | Assignment occurs only after agreed funding, founder protections, role/retainer terms, and counsel-reviewed documents are complete.

Option not exercised / payments stop | Razim retains IP | Exclusivity and limited rights end, unless a narrow survival right is expressly agreed.

The preferred protective route is licence first, assignment later. This gives NewCo enough control to operate while ensuring Razim does not transfer ownership before founder protections and funding are locked.

Investor Protection

- Paid exclusivity during the option period.
- Staged path to majority ownership if agreed funding milestones are completed.
- Milestone review and acceptance criteria.
- Option or warrant mechanics to be documented by counsel.
- Information rights, source/code escrow, and board/observer rights to be agreed if appropriate.

Founder Protection

- No automatic equity transfer before the relevant milestone is funded and accepted.
- No selective dilution or related-party issuance without agreed protections.
- Pre-emption rights, information rights, and reserved matters to be agreed.
- IP sale, exclusive licence, or assignment should require agreed approval mechanics.
- Background tooling and generic methods carve-out to be agreed.

Conditions

- Counsel-reviewed option and company documents.
- Clear milestone definitions.
- Tax and securities review of any founder share transfer, warrant, SAFE, or call option.
- Treatment of option pool, contractors, later CTO, engineers, and future hires.
- Services, employment, interim CTO, or advisory agreement for Razim if he continues delivery or technical oversight.
- Treatment of leaver events and founder removal without cause.

Non-Binding Effect

This term sheet is for discussion only. No party is bound unless and until definitive agreements are signed.
